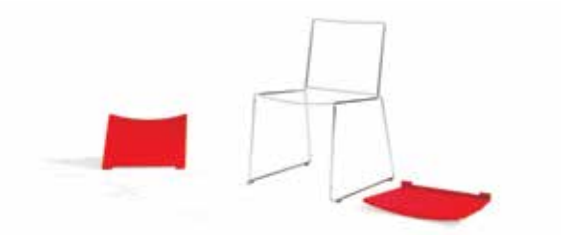
palmer HAMILTON



- Lightweight
- Stackable
- Easily renewable

filo

Filo renewable chairs

filo incorporates intelligent design like no other high density stack chair. Providing unsurpassed strength while eliminating the need for a front cross beam, allowing for leg under comfort, it will withstand the rigors of high-use environments. Options include stacking arm chair, stacking stool height, stacking stool height with arms and ganging clips.

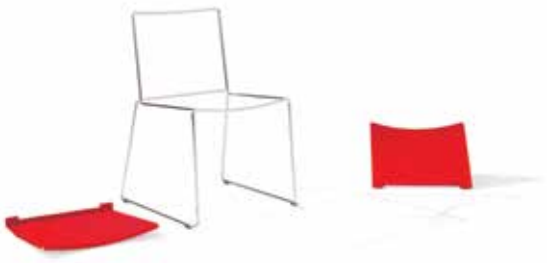
seating

The Filo chair stacks 40 high with a cart and 15 high on the floor. Glides are standard with an optional felt pad for smooth surface applications.

One of the largest of its class the Filo chair comes in at 22.44" deep x 21.26" wide x 32.5" high. Filo accommodates both the petite and the big and tall.

Designed by Alberto Basaglia and Natalia Rota Nodari the Filo features a renewable seat and back. Tired of the color you have? Simply replace the seat and back with our toolless replacement system. Although nearly impossible to remove without proper instructions the seats and backs can be exchanged once you know the secret removal process.

Optional carts The Filo chair stacks 40 high in a single cart and 80 in a double stack cart while easily fitting through standard doors.



The replaceable seat and back panels are easily renewable and are available in 7 standard UV resistant and outdoor approved colors. Custom colors are available. White frames are outdoor rated as standard. Other frame colors can be outdoor rated with extended lead times. Every chair is 100% recyclable.
