

RE-LOAD™

Specs for DC & SC Models Features, Construction and Accessories

- RE-LOAD Power options - untethered (DC), untethered self-charge (SC)
- DC Untethered - does not have charger provided, must use with battery cart.
- SC Untethered - supplies charger in battery compartment.
- Table thickness - 1 1/8" M3 particle board w/.030" vertical grade laminate with balanced backer.
- Edge Options/Materials - SmartEdge, durable casted polyurethane edge.
- Laminate Options – Wilson Art -60 or -38, other options available at up-charge.
- Table base is made from sturdy tubular steel design.
- Casters - 2 1/2" twin caster w/locking brake in black only.
- Glides - 1 1/2" diameter adjustable non swivel glide in black only. Adjustable to 5/8" vertical.
- Backpack hooks standard on 42" high unit only.
- Battery Compartment - locking keyed access, keyed alike, 2 keys included.
- Power availability (charging time) will depend on devices, amount of consistent charging time and temperature of environment. Approximately 5 hrs if charging 4 Apple tablets or 8+ hrs for phones and other devices. Battery will re-charge in 4 – 5 hours after connecting to charger and plugging into wall.
- Battery - 12V 18Ah sealed lead acid battery (SLA), maintenance free. Keep from freezing temperatures for long periods of time or extreme heat for DC. This will assist the system in being trouble free.
- DC Power - 12 V system providing 2 amp draw from each port. When battery hits 10%, light turns from BLUE LED to RED LED and will require charging of the battery, hub will continue to charge until RED LED turns off. Even though battery will not charge after this point, it will still hold a charge. There is a designed safety shutoff on the battery so it will not go into a deep discharge mode, hence, increasing the life of the battery. Deep discharging of a battery will significantly reduce the life of the battery. Under normal conditions and charging, the battery life should last around 3+ years.

Reload DC SC Spec Sheet 08062019

- The charger supplied, either in the charging cart or self-charge, is a 5-stage charger which will maximize the life of the battery also.
- Do not plug charger to charging hub, nothing will happen. It will not provide power to charging hub.
- There is a 7.5A blade fuse in the system to provide a safeguard from damaging the system.
- Warranty - 1 year on charging hub, charger, and battery and 5 years remaining components (top and base).
- Recharging Cart – 120V plug into wall outlet, 20amp circuit required – 8 chargers, 8 batteries, included with charging cart. Recharging cart sold separately from table. Measures 39 1/2" H x 39 1/2" W x 20 1/2" D.
- Separate components, batteries and chargers, will be available for individual purchase, but only come with a 30-day warranty period.
- All RE-LOAD's and batteries MUST ship ground transportation.

RE-LOAD Product Dimensions and Weights

Please note, add 2" for height to include the charging hub.
