

Vacaville High School

Project: "Chow House" for the Vacaville High School in Vacaville CA.

This is the first time that I have ever done something like this and needless to say I was skeptical. I know this would have been a lot easier in new construction or a room without so many obstacles, but you took a room that was completely ugly and transformed it into a room that is the best I have ever served from, and I have been in the business for a long time. I have always concentrated on food items and food equipment but never on the food environment. I am sold and I hope to convince my district to do more projects.

Juan Cordon – VUSD Director of Child Nutrition
Vacaville High School, CA

"It is very rare to have someone promise what they say they would do and they did just that."

Vacaville High School

Project: "Chow House" for the Vacaville High School in Vacaville CA.

I received pictures and my coworker saw the actual job and we are extremely happy! I will let you know that besides all of the design and graphics being top-notch, I think the install team is just as good. They made the entire installation seamless and enjoyable. It is very rare to have someone promise what they say they would do and they did just that. I also need to thank you and your design team as well as the PH representatives. A PH representative has been out here numerous times, and it was comforting to know someone was just a phone call away.
