

METHOD

Sleek design, comfortable, and affordable multi-use chairs in heights for all uses.

STACKING CHAIRS

TASK CHAIRS

STACKING CHAIRS

Seat Construction

- Seats are single-piece, injection molded from special high impact, blush resistant polypropylene plastic.
- Textured surface is lightly etched to provide a non-slip surface.
- The shell is attached to the frame with four screws and bolts.

Frame

- 4-Leg Stack Chair frames are formed with 1" diameter, 18 gauge steel. Stack up to 8 chairs of like sizes.
- 4-Leg Bar Stool frames are formed with 1" diameter, 16 gauge steel. Cross bars are .5" diameter, 18 gauge steel.
- All 4-leg chairs have a glide attachment

with a standard internal gripping spring to fit the 1" outside diameter tubing. The glide has a ferrule glide casing constructed

of durable case hardened steel. All glides make full level contact with the floor.

- Felt pads are available for floor protection.

Size Options

- Stackable frames are available in three sizes, from elementary to adult seat heights: 14", 16", and 18".
- Pub chairs have seat height of 28".

TASK CHAIRS

Seat Construction

- Seats are single-piece, injection molded from special high impact, blush resistant polypropylene plastic.
- Textured surface is etched to provide a non-slip surface.
- The shell is attached to the frame at the base and control assembly.

Frame

- 5-Star base is made of reinforced nylon and receives the adjustable column assembly and casters.

- 5-Star bases have nylon dual-wheel hard casters.
- The adjustable seats come with a 300N black pneumatic cylinder that adjusts the chair's seat height from 16.5" to 21.5". The stool version adjusts the chair's seat from 23" to 33".

- The control assembly is a control bracket made of a single formed 12 gauge steel bracket bolted to a die cast aluminum control with four (4) 5/16-18 x 1.375" long bolts.
- The stool has an adjustable 24" diameter foot ring attached to the column assembly
